

Brenda Christian Cosmetics, Inc.

We are a closely held group; dedicated to offering you personalized skincare and excellent customer service. Brenda herself, works directly with scientists, raw ingredient innovators, and organic farmers to produce our products. Brenda personally tests each one on herself and friends, never animals. Each formula earns the "Brenda Christian" label after it passes her personal tests for ease of use and real benefit oriented results.

For over 25 years, Brenda Christian has been recognized within the industry for her dedication to innovative cosmetics providing real solutions to daily makeup challenges. Now with the introduction of her exclusive skin treatment collection, formerly available only to her confidential private clientele, Brenda takes a bold step into pro skin care.

Each of the products in the Brenda Christian skin care line is produced with a focus on the comfort of the most sensitive skin types. Brenda Christian uses the purest forms of our ingredients, perfectly blending certified organic oils, herbs, and vitamins with innovative science. Our products are non-comedogenic (non-pore clogging), fragrance free, and human tested. The formulas are most often produced in laboratories pharmaceutically rated, which results in increased production expense that Brenda believes is well worth the additional expense. This assures your clientele of the highest quality of manufacturing of each Brenda Christian product.

Professional education classes for both esthetic services and retail merchandising are available.
